Campus Food Ordering System

User Manual

Document User /Manual	Canteens Darshni & Oota	Version v1.0 Prototype	Platform Web App
---------------------------------	---------------------------------------	----------------------------------	----------------------------

App Prototype Link: https://sundaram2430.github.io/Campus_Bite/

This manual provides a complete step-by-step guide to operating CampusBite. It covers both the Student (User) interface and the Vendor (Canteen Owner) interface.

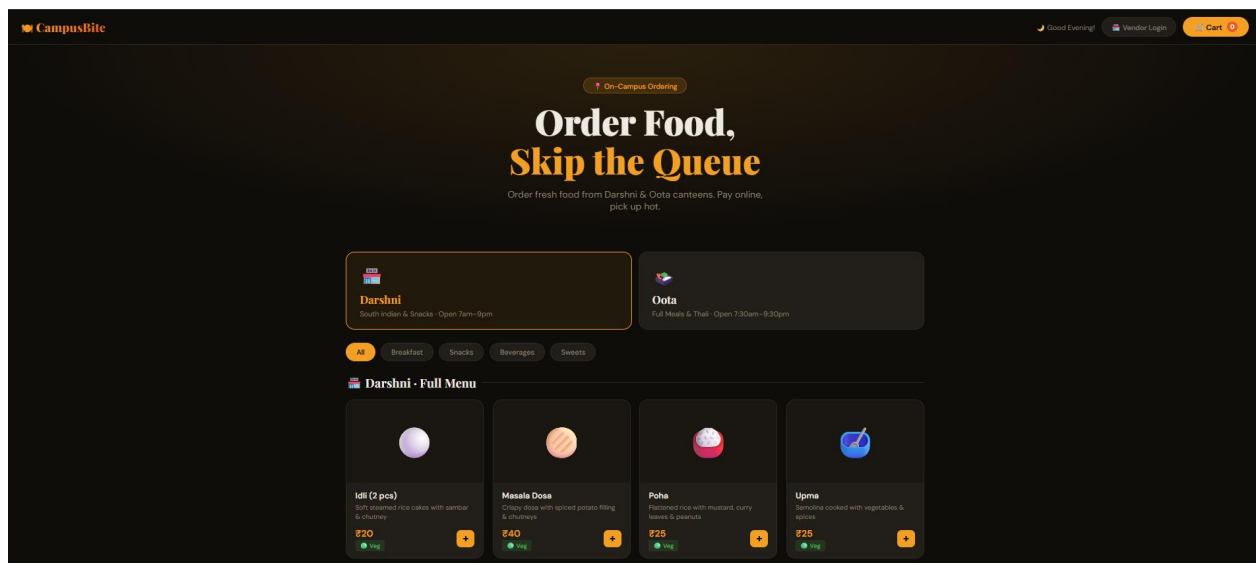

PART A — Student / User Guide

PART B — Vendor / Canteen Owner Guide

PART A — Student / User Interface

Objective

To place a food order from Darshni or Oota canteen, pay securely, and collect food using an order token — without standing in a physical queue.

Step-by-Step Ordering Guide

1	Open the App	Navigate to the CampusBite URL in any browser on phone or laptop. No installation required. The app loads immediately.
----------	---------------------	--

Greeting Banner	Time-based Welcome Message	<i>Top-right navigation shows: "Good Morning / Good Afternoon / Good Evening" based on current time of day.</i>
------------------------	-----------------------------------	---

2	Select a Canteen	Two large canteen cards appear on the home screen. Tap the card for the canteen you want to order from.
----------	-------------------------	---

Darshni Canteen	Oota Canteen
South Indian Breakfast, Snacks, Beverages, Sweets Open: 8 AM – 8 PM	Full Meals, Thali, Biryani, Curries, Non-Veg, Rice Open: 11 AM – 9 PM

Icon to click: The large canteen card box. A green border appears around the selected canteen.

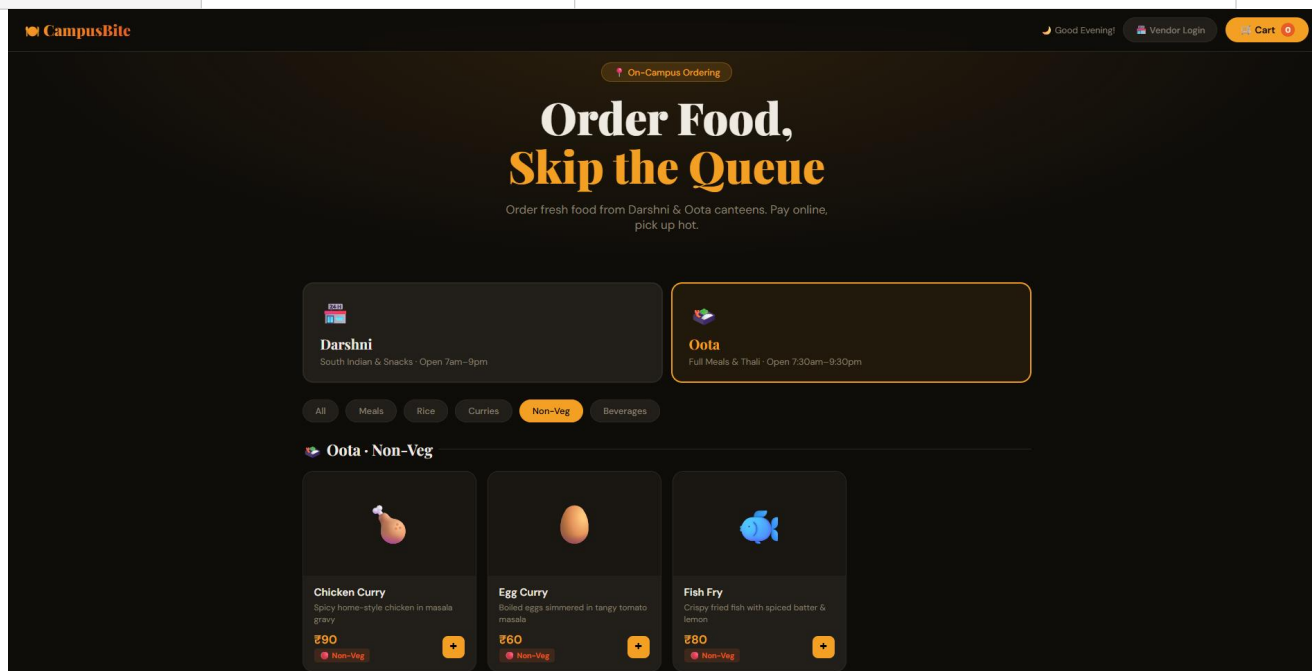

3	Filter by Category	Use the horizontal category pill buttons below the canteen cards to filter menu items by food type.
----------	---------------------------	---

Category Pills	Filter buttons (horizontal row)	<i>Darshni pills: All / Breakfast / Snacks / Beverages / Sweets. Oota pills: All / Meals / Rice / Curries / Non-Veg / Beverages. Active pill turns amber/orange.</i>
-----------------------	--	--

4	Browse the Menu	Food cards are displayed in a grid. Each card shows important information:
----------	------------------------	--

Card Element	What it shows	Meaning
Food Emoji / Image	Visual identifier	Quick visual recognition of the dish
Food Name	Name of item	e.g., Masala Dosa, Chicken Biryani, Idli (2 pcs)
Description	Ingredient brief	Preparation method and key ingredients listed
Price (Rs.)	Cost per unit	Price in Indian Rupees, e.g., Rs.40

Green Round Badge	Veg indicator	GREEN circle = vegetarian item
Red Round Badge	Non-Veg indicator	RED circle = non-vegetarian item
+ Button (amber colour)	Add to cart button	Tap the amber PLUS button to add one unit to cart

5	Add Items to Cart	Tap the + (amber plus button) on any food card to add it to your order.
----------	--------------------------	---

+ (Plus Button)	Add to Cart	<i>A toast notification pops up at bottom-right confirming the item added. The cart icon counter at top-right updates immediately.</i>
------------------------	--------------------	--

- / + (Quantity Controls)	Adjust item quantity	<i>After adding, the + becomes a minus/plus quantity adjuster. Tap - to reduce quantity. When quantity reaches 0, item is removed from cart.</i>
----------------------------------	-----------------------------	--

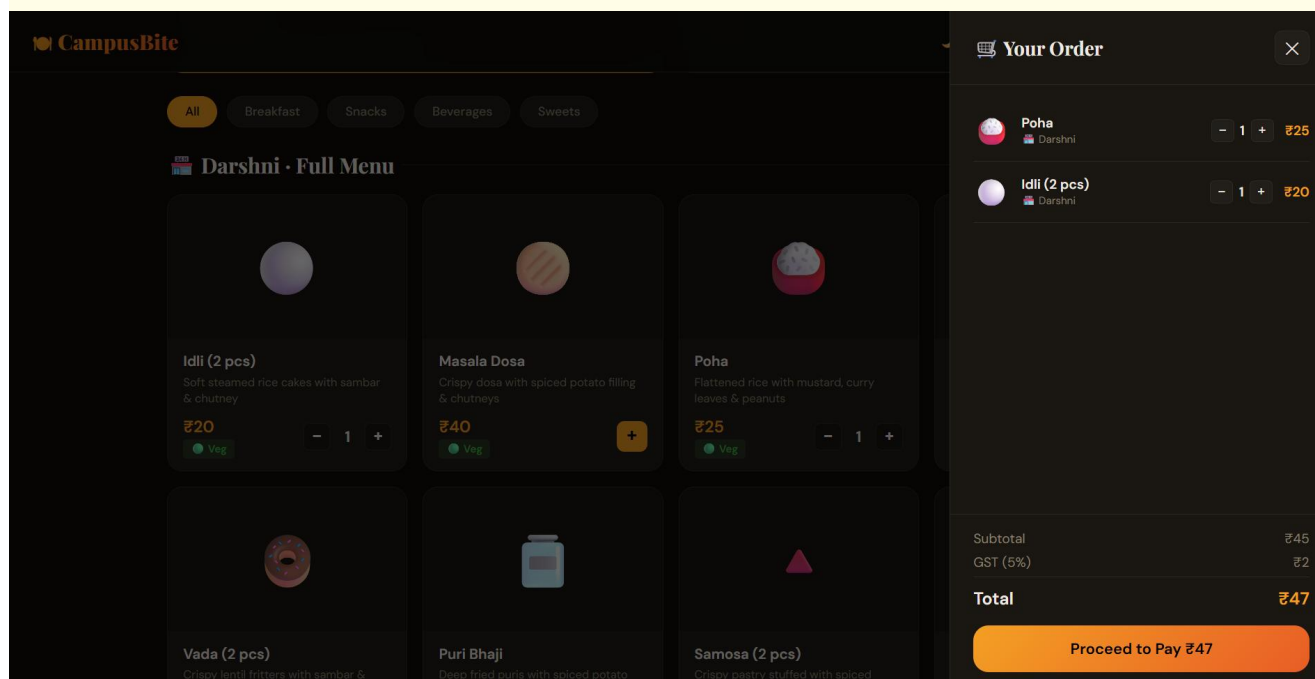

6	Open & Review Cart	Tap the Cart button at the top-right of the navigation bar to review your full order.
----------	-------------------------------	---

The cart drawer slides in from the right side of the screen. It shows:

- All added items: emoji, name, canteen label, quantity controls, and line total

- Subtotal and 5% GST automatically calculated
- Grand Total shown in bold amber text at the bottom
- "Proceed to Pay Rs.XX" green button to confirm order

Icon to click: The "Cart" button at the top-right navigation bar. The badge number shows total items in cart.

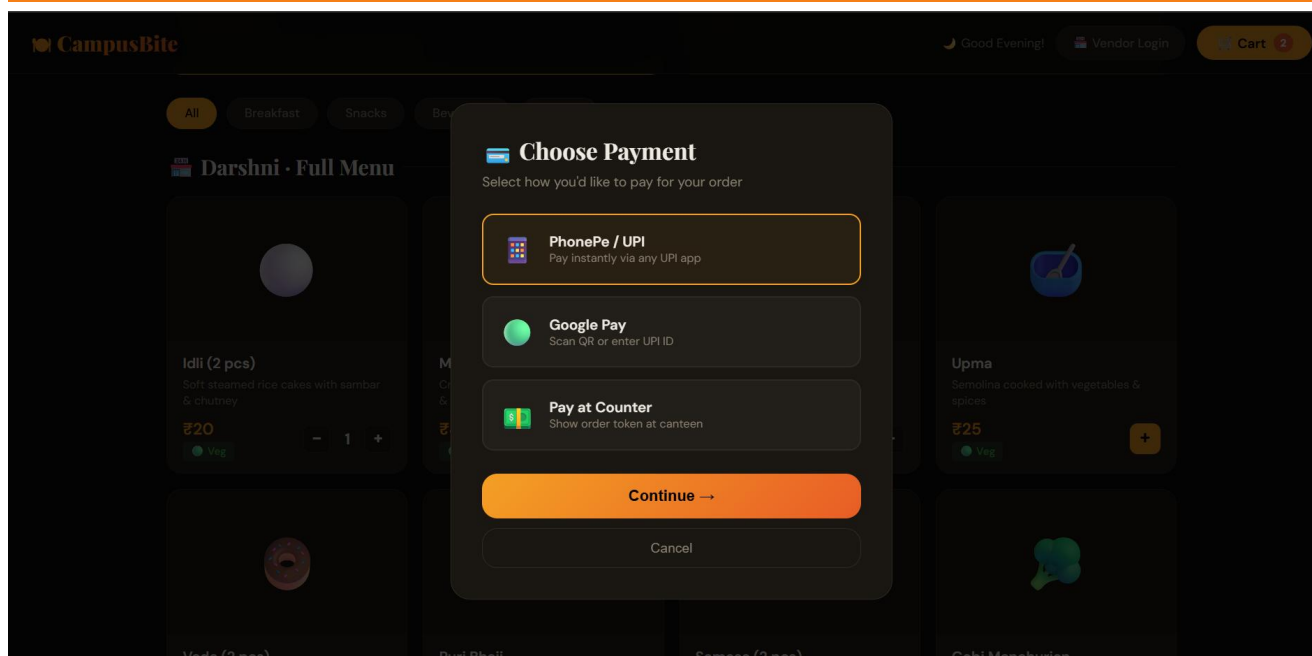

7

Choose Payment Method

Tap "Proceed to Pay" inside the cart to open the payment selection screen.

Icon	Payment Method	How to use it
UPI	UPI / GPay / PhonePe	Tap to select. Confirm payment in your UPI app when the payment screen opens.
Card	Debit / Credit Card	Tap to select. Enter card details in the secure payment gateway.
Cash	Pay at Counter	Tap to select. Show your order token number at the canteen and pay cash when collecting.

Icon to click: Tap the payment method card (it gets a green highlight border when selected). Then tap the amber "Pay Rs.XX" button to confirm.

8

Order Confirmed — Token Generated

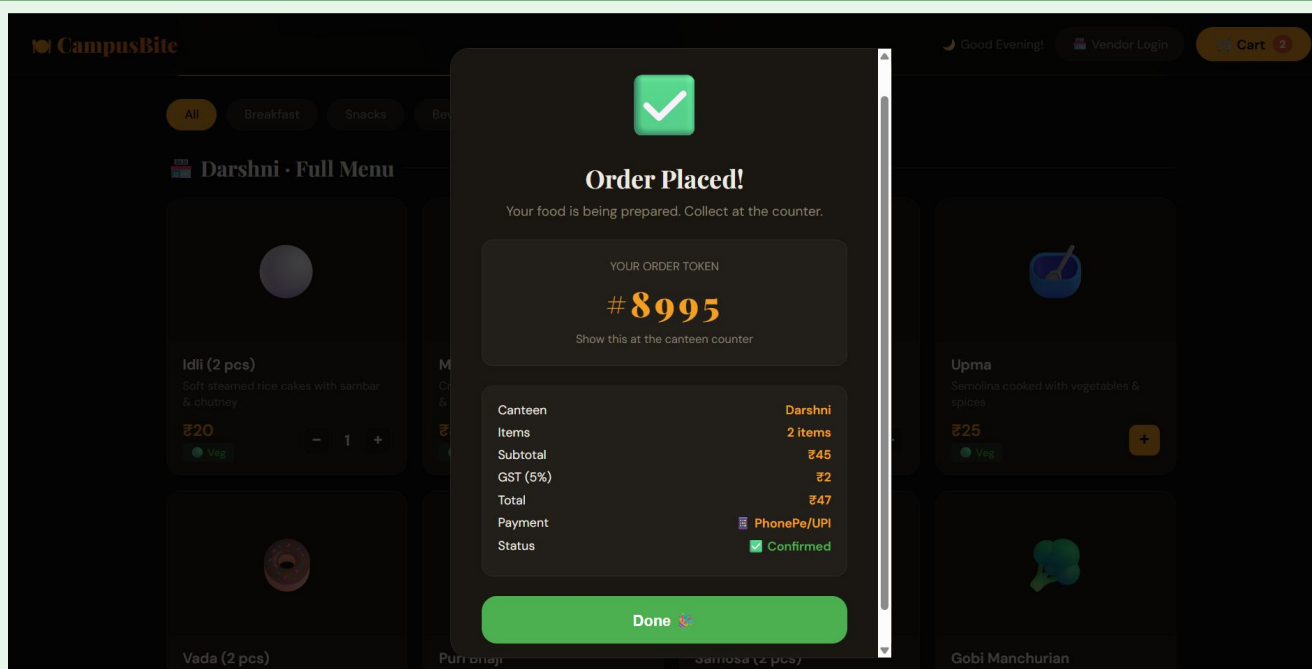

After payment is confirmed, a success screen appears with your unique order token.

Order Confirmation Screen shows:

YOUR ORDER TOKEN — a large bold 4-digit number, e.g. #4872

This token is your food pickup pass. Show it at the canteen counter.

Summary shown below token: Canteen name · Number of items · Amount paid · Payment method · Status: Confirmed

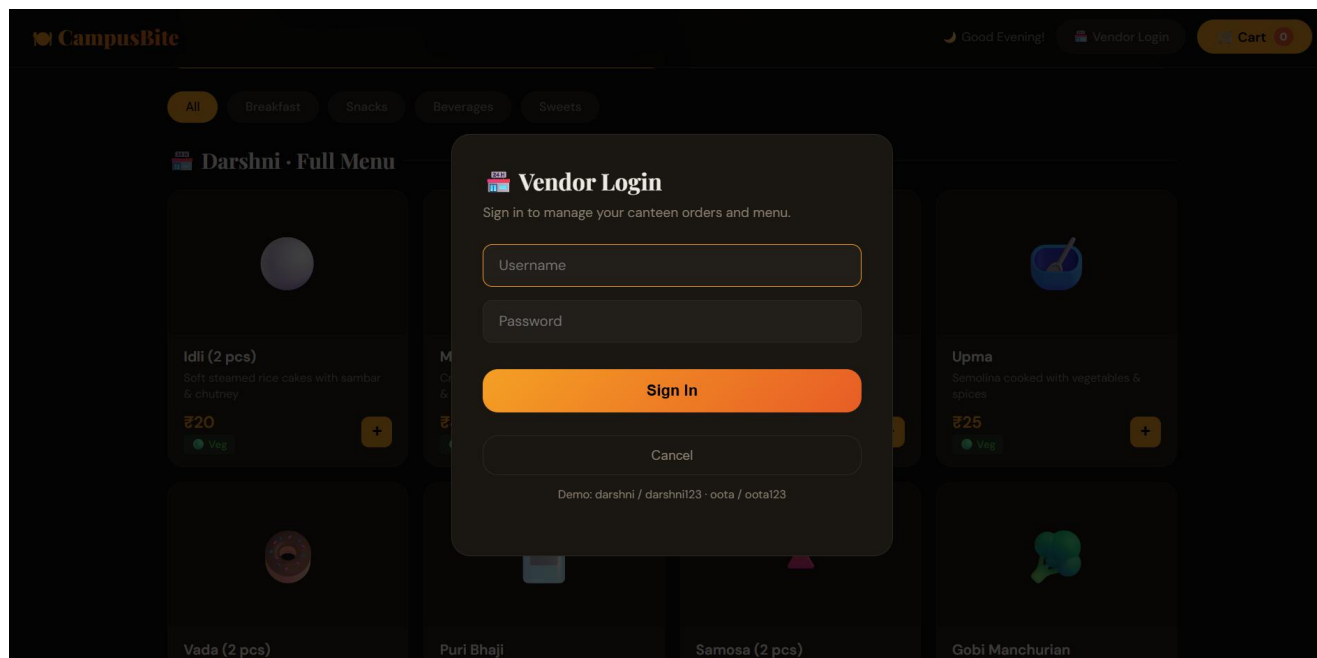

9**Collect Your Food**

Walk to the canteen counter. Tell the vendor your token number or show your screen. Collect your order when they call your token.

PART B — Vendor / Canteen Owner Interface

Objective

To manage incoming student orders, prepare food efficiently using the token system, and maintain smooth counter operations for Darshni and Oota canteens.

Vendor Workflow — Order Management (7 Steps)

1	Receive Order Notification	When a student completes payment, the order appears instantly on the vendor dashboard. It shows: token number, items ordered, quantities, and total amount. Only orders for your canteen appear.
2	Read the Order Token	Each incoming order has a unique 4-digit token (e.g. #4872). Note it on a preparation slip. All communication with the student uses this token number only.
3	Read the Order Items	The order card lists: item name, quantity ordered, veg/non-veg category, and total amount. Begin preparing items in the sequence orders arrive.
4	Mark Order as Preparing	Tap the "Preparing" button on the order card to update the status. The student's app status changes to "Being Prepared" so they know to wait.

5	Mark Order as Ready for Pickup	Once food is packed and ready, tap "Ready for Pickup". The student receives a notification on their device to come collect.
6	Verify Token at Counter	When the student arrives, ask for their token number verbally or check their screen. Match it to the order in the system before handing over the food package.
7	Mark Order as Collected	Tap "Collected" to mark the order as fully fulfilled. The order moves to the completed orders log for record-keeping.

Menu Management — Admin Panel

[Logout](#)

Vendors manage their canteen menu from the Admin Panel login:

- Navigate to the canteen admin panel using your vendor login credentials
- Tap "Add New Item +" to add a dish — fill in: name, category, price, veg/non-veg type, description
- Tap the Edit (pencil icon) on any item card to update price, name, or description
- Toggle the Availability switch to mark items as "Sold Out" temporarily during busy periods
- Tap the Delete (trash icon) to permanently remove an item (confirmation dialog appears)

Vendor Icon Reference Table

Icon / Button	Action Name	What happens when tapped
Order Bell / Notification	New order arrived	Appears at top of queue with 4-digit token, items list, and total amount
Preparing Button	Mark order cooking	Status updates to "Preparing" — student sees live update on their app
Ready for Pickup Button	Food is packed	Sends notification to student's device to come collect the order
Collected / Done Button	Order fulfilled	Closes order, moves to completed log. Order counter updates.
Edit Icon (Pencil)	Edit menu item	Opens edit form: change item name, price, description, or category
Availability Toggle (On/Off)	Toggle item visibility	On = item available to order; Off = item shows as Sold Out for students
Delete Icon (Trash Can)	Remove menu item	Shows confirmation dialog, then permanently removes item from menu
Add New Item Button (+)	Add new dish	Opens form to add a new food item: name, price, type, description

Quick Reference Card

Student — 9-Step Ordering Flow

1 Open App	2 Pick Canteen	3 Filter	4 Browse	5 Add to Cart	6 View Cart	7 Pay	8 Get Token	9 Collect
----------------------	--------------------------	--------------------	--------------------	-------------------------	-----------------------	-----------------	-----------------------	---------------------

Vendor — 7-Step Order Fulfilment Flow

1 Receive Order	2 Read Token	3 Read Items	4 Preparing	5 Ready	6 Verify Token	7 Complete
---------------------------	------------------------	------------------------	-----------------------	-------------------	--------------------------	----------------------

Troubleshooting Guide

Problem	Solution
App not loading	Check internet connection. Refresh the page. Try Chrome or Safari.
Cart count not updating	Scroll the page up and down to refresh the view. Re-add the item.
Payment failed	Check UPI balance or card details. Try a different method. Use Pay at Counter as backup.
Token not visible after payment	Do not close the browser window. Scroll down on the confirmation screen to find the token.
Vendor: order not appearing on dashboard	Refresh the vendor dashboard page. New orders sync within 30 seconds.
Item shows as Sold Out	The vendor has marked that item temporarily unavailable. Ask canteen staff for alternatives.
Wrong items added to cart	Open the cart drawer and tap the minus (-) button next to unwanted items to remove them before checkout.

CampusBite — Campus Food Ordering System
